

Becoming Engr Bernard Bwalya Mumba

Civil & Structural Engineering Services – Zambia ■■

Company Overview

Becoming Engr Bernard Bwalya Mumba provides professional civil and structural engineering services focused on safety, durability, and compliance with engineering standards. Services are tailored to residential, commercial, and small infrastructure projects across Zambia.

Core Services

- Structural design (reinforced concrete and masonry structures)
- Structural assessment and crack inspection
- Construction supervision and site inspections
- Engineering drawings and council approval support
- Foundation, soil, and building extension advice

Engineering Approach

All projects follow a clear engineering process: assessment of site conditions, safe structural design, compliance with local standards, and supervision to ensure design intent is achieved during construction.
